CDI-116	溶剂型润湿分散剂 Solvent borne dispersant	100	用于通用溶剂型色浆、溶剂型工业漆和溶剂型油墨的润湿分散剂，零VOC，特别适用于醇类和极性较高溶剂体系和各种有机、无机颜料 Suitable for general solvent borne pigment concentrate, industry coating and ink; especially good for dispersing organic and inorganic pigment in alcohol based/high polarity solvent borne formulations	特别对醇类溶剂体系和有机颜料的分散有很好效果； 通过空间位阻稳定作用而使颜料解絮凝； 高光泽，展色强； 大大降低有机颜料粘度，改善色浆流动性，并能提高色浆颜料的含量； 透明颜料的透明度和不透明颜料的遮盖力也得到提高。 Especially good in alcohol based solvent system,. By steric stabilization, the additive can deflocculates and stabilizes the pigments effectively; Achieve high level of gloss and colour strength excellent viscosity reduction for organic pigments, increase flowability of the pigment concentrate and pigment loading; Improve transparency for some pigments; improve hiding power for TiO2	先将产品在溶剂和树脂中溶解好，再加入颜料研磨 Dissolve product in solvent and resin well before adding pigments for grinding
