

CDI-186

溶剂型润湿分散剂
Solvent borne dispersant

100

用于高极性体系中钛白粉， 填料的分散， 同时通过流变性的调节防止浮色， 沉淀的发生
Dispersant for TiO₂ and inorganic filler in high polarity solvent borne systems, at the mean time can adjust rheology performance to prevent floating and hard sedimentation

通过空间位阻稳定作用而防止浮色和沉淀；
适用于高极性体系；
降低钛白和填料粘度；
Through steric hindered effect to prevent floating and hard sedimentation
suitable for high polarity solvent system
reduce viscosity of TiO₂ and inorganic fillers

先将产品在树脂中溶解好， 再加入钛白或填料分散
Dissolve product in resin well before adding TiO₂ or filler for grinding
