UV润湿分散剂 Dispersant for solvent borne UV coating and ink Dispersant for UV formulation 100% active matter; zero VOC. Good for all kinds of orginc, inorganic pigments.

用于溶剂性 UV 涂料和 UV 油墨的高分子润湿分散剂;

100% 活性物质,零 VOC,适用于各种有机,无机颜料,通用性好

对有机颜料和炭黑有出色的降粘作用,可增加颜料填充量,提高研磨效率; 色浆具有良好的展色性和稳定性; 减少絮凝,浮色,发花产生; 对无机颜料和填充物也有降粘作用; 提高光泽,降低雾影。 Strong viscosity reduction for organic pigments and carbon black,can

按周光祥,降低务影。 Strong viscosity reduction for organic pigments and carbon black, can incread pigment loading and inprove grinding efficiency; Can also use for inorganic pigments and fillers high levels of gloss can be achieved and the colour strength is improved. 先将产品在溶剂和树脂中溶解好, 再加入颜料研磨 Dissolve product in solvent and resin well before adding pigments for grinding
